Nguyen Dinh Dong Kha

FullStack Developer

(+84)799888907 nguyendinhdongkha@gmail.com https://www.khadon.io.vn Ho Chi Minh City, Viet Nam

https://github.com/khadonnn

SUMMARY

I am a Full-stack Developer with experience building web applications using Next.js, TypeScript, MERN Stack, Tailwind CSS, Prisma, and PostgreSQL. I enjoy learning new technologies, improving my skills, and creating useful and user-friendly applications.

EDUCATION

University of Information Technology - UIT 2024 - Expected 2026

Bachelor of Software engineering - GPA: 3.3/4.0

VNUHCM – University of Science Feb - Jun 2024

Certificate in JavaScript HTML5, CSS3, JavaScript, Bootstrap, NodeJs, MongoDB - GPA: 8.5/10

Ton Duc Thang University 2018 - 2023

Bachelor of Business administration - GPA: 7.1/10

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, SQL
Frameworks & Libraries:	Next.js, React, Node.js, Express.js, Prisma ORM, Tailwind CSS, Shadcn/ui, Zustand, TanStack, Socket.IO
Database	MongoDB, PostgreSQL, Redis
Architecture & Security	Microservices, Monorepo, Hybrid Recommendation Systems, RAG/AI Agents, Hugging Face, JWT, OAuth 2.0, Clerk, NextAuth
Developer Tools	Git, Postman, Docker, Vercel, Render, Turborepo

PROJECTS

Stazy Travel - Hotel Booking AI Platform *Dec 2025 - May 2026*

TypeScript, Next.js, TanStack, PostgreSQL, Kafka, Redis, BullMQ, Python, Prisma, Turborepo, Docker

- Architected an event-driven microservices booking platform, utilizing Kafka (Outbox Pattern) and the Saga Pattern to ensure strict distributed data consistency.
- Engineered a Hybrid Recommendation System combining Collaborative Filtering with Python-based NLP sentiment analysis.
- Optimized API performance by offloading heavy AI processing and background tasks using BullMQ and Redis.
- Streamlined system deployment and cross-service development within a Turborepo monorepo (pnpm corepack), containerizing all services with Docker.
- **Github**: https://github.com/khadonnn/stazy_travel

Live Code - Video Calling & Real-time Interview Platform *Mar - May 2026*

React, Node.js, MongoDB, Stream, Inngest, Piston API

- Built a real-time coding interview platform with live video call and shared code editor using Stream library.
- Added multi-language code execution using the Piston API for live coding interviews.
- Used Inngest to handle background jobs running on Docker.
- Developed the full-stack app with the MERN stack, supporting real-time updates and responsive UI
- **Github**: https://github.com/khadonnn/live-code

Chat App - Realtime Chat App June - Nov 2025

MERN + Socket.io + TailwindCSS + Daisy UI

- Built a real-time chat app using the MERN stack, Socket.IO, TailwindCSS, and DaisyUI
- Implemented JWT authentication, live messaging, online status, and pinned messages
- Managed global state with Zustand and created responsive multi-page UI with theme customization.
- **Github**: https://github.com/khadonnn/chat-app

CERTIFICATE

VNUHCM - JavaScript HTML5, CSS3, JavaScript, Bootstrap, NodeJs, MongoDB – 8.5/10	2024
React Basics Meta Certificate	2024
IELTS - Overal 5.5	2022
